Dear Marketing Manager:

The International MYOPAIN Society [IMS] will host **MYOPAIN 2010, the Eighth World Congress on Myofascial Pain Syndrome and Fibromyalgia Syndrome**, to be held October 3-7, 2010 at the Hotel Beatriz in Toledo, Spain. The Congress will be jointly sponsored by the IMS and by the UT Health Science Center San Antonio School of Medicine. The program promises to provide new information about myofascial pain syndrome, fibromyalgia syndrome, and other similar syndromes.

Internationally recognized experts will present state-of-the-art research in the daily plenary scientific sessions. In addition, there will be new scientific reports displayed in the daily poster sessions in the exhibit area along with commercial and other focus displays. Based on records from the first seven IMS meetings, it is reasonable to expect that health care professionals from over 30 countries will attend the Toledo, Spain congress. Exposure of the attendees to the displays in the exhibit area [Monday-Wednesday] will be assured by the constant activity associated with the poster sessions and refreshment breaks in close proximity.

Please consider one of the exhibit levels shown on the **Exhibitor Prospectus**. Also for your review is an **Exhibitor Commitment Form**. Please note on that form **Payment Methods**.

We appreciate your consideration of this opportunity, and we hope that you will elect to join us for this important conference. If you have questions or need additional information, please do not hesitate to contact us at [myopainsociety@gmail.com](mailto:myopainsociety@gmail.com) or Barbara Runnels at 1-210-216-7440.

Regards,

Robert D. Gerwin, MD  
IMS President
